Fentanyl Screen (LC-MS/MS)	Not detected	Not detected

Test	Specification	Result
Sterility Screen (rapid PCR)	No growth	No growth
Heavy Metals (ICP-MS)	ICH Q3D limits	All analytes within limits

Identity confirmed by LC-MS with mass confirmation of each declared component. Chromatographic purity is not a meaningful measure for a multi-component formulation and was not run. Fentanyl screening by targeted LC-MS/MS. Sterility by rapid nucleic-acid amplification — a screening method, not compendial sterility per USP <71>. Full methodology available on request.
